ARCO

Temporary solutions for the expansion of work spaces, common areas, collection areas, storage, schools, study rooms, shopping centers... as well as any other activity that needs to be carried out temporarily.

The versatility of these spaces allows their rapid installation, adaptation to the terrain and the purpose to be developed in it.

AMG is a specialist in the design and installation of temporary structures and semi-permanent.

For any situation, at any time.
Turnkey solutions.

MAIN FEATURES

Sustainable

Assembly and disassembly in short terms, quick solutions

Relocatable

Modular design (flexible in its dimensions and height)

Light width up to 20m

Suitable for temporary or fixed periods.

Compliant with building ordinances.

Turnkey service, these structures are delivered complete to start your activity.

Option to rent or buy

ARCO

The Arco is an essential structure for AMG, a product range made up of temporary and semi-permanent structures.

Arco complies with construction regulations, with ground rectangular of 8, 10, 15 or 20 m. portico, growing from five in five meters everything that is necessary to host any use or event, whether social, sports, educational, fair, logistics, car parks... It is built entirely in aluminum and equipped with a floating floor.

Arco can be quickly at your disposal, with very short assembly times and with the possibility of disassemble it completely and reuse it elsewhere.

ARCO

ARCO

ARCO

The enclosure is made of glass or rigid panels, which allows total insulation from the outside, making the most of the air conditioning of the structure, but it can also be served with a smooth soft PVC enclosure or with transparent PVC windows.

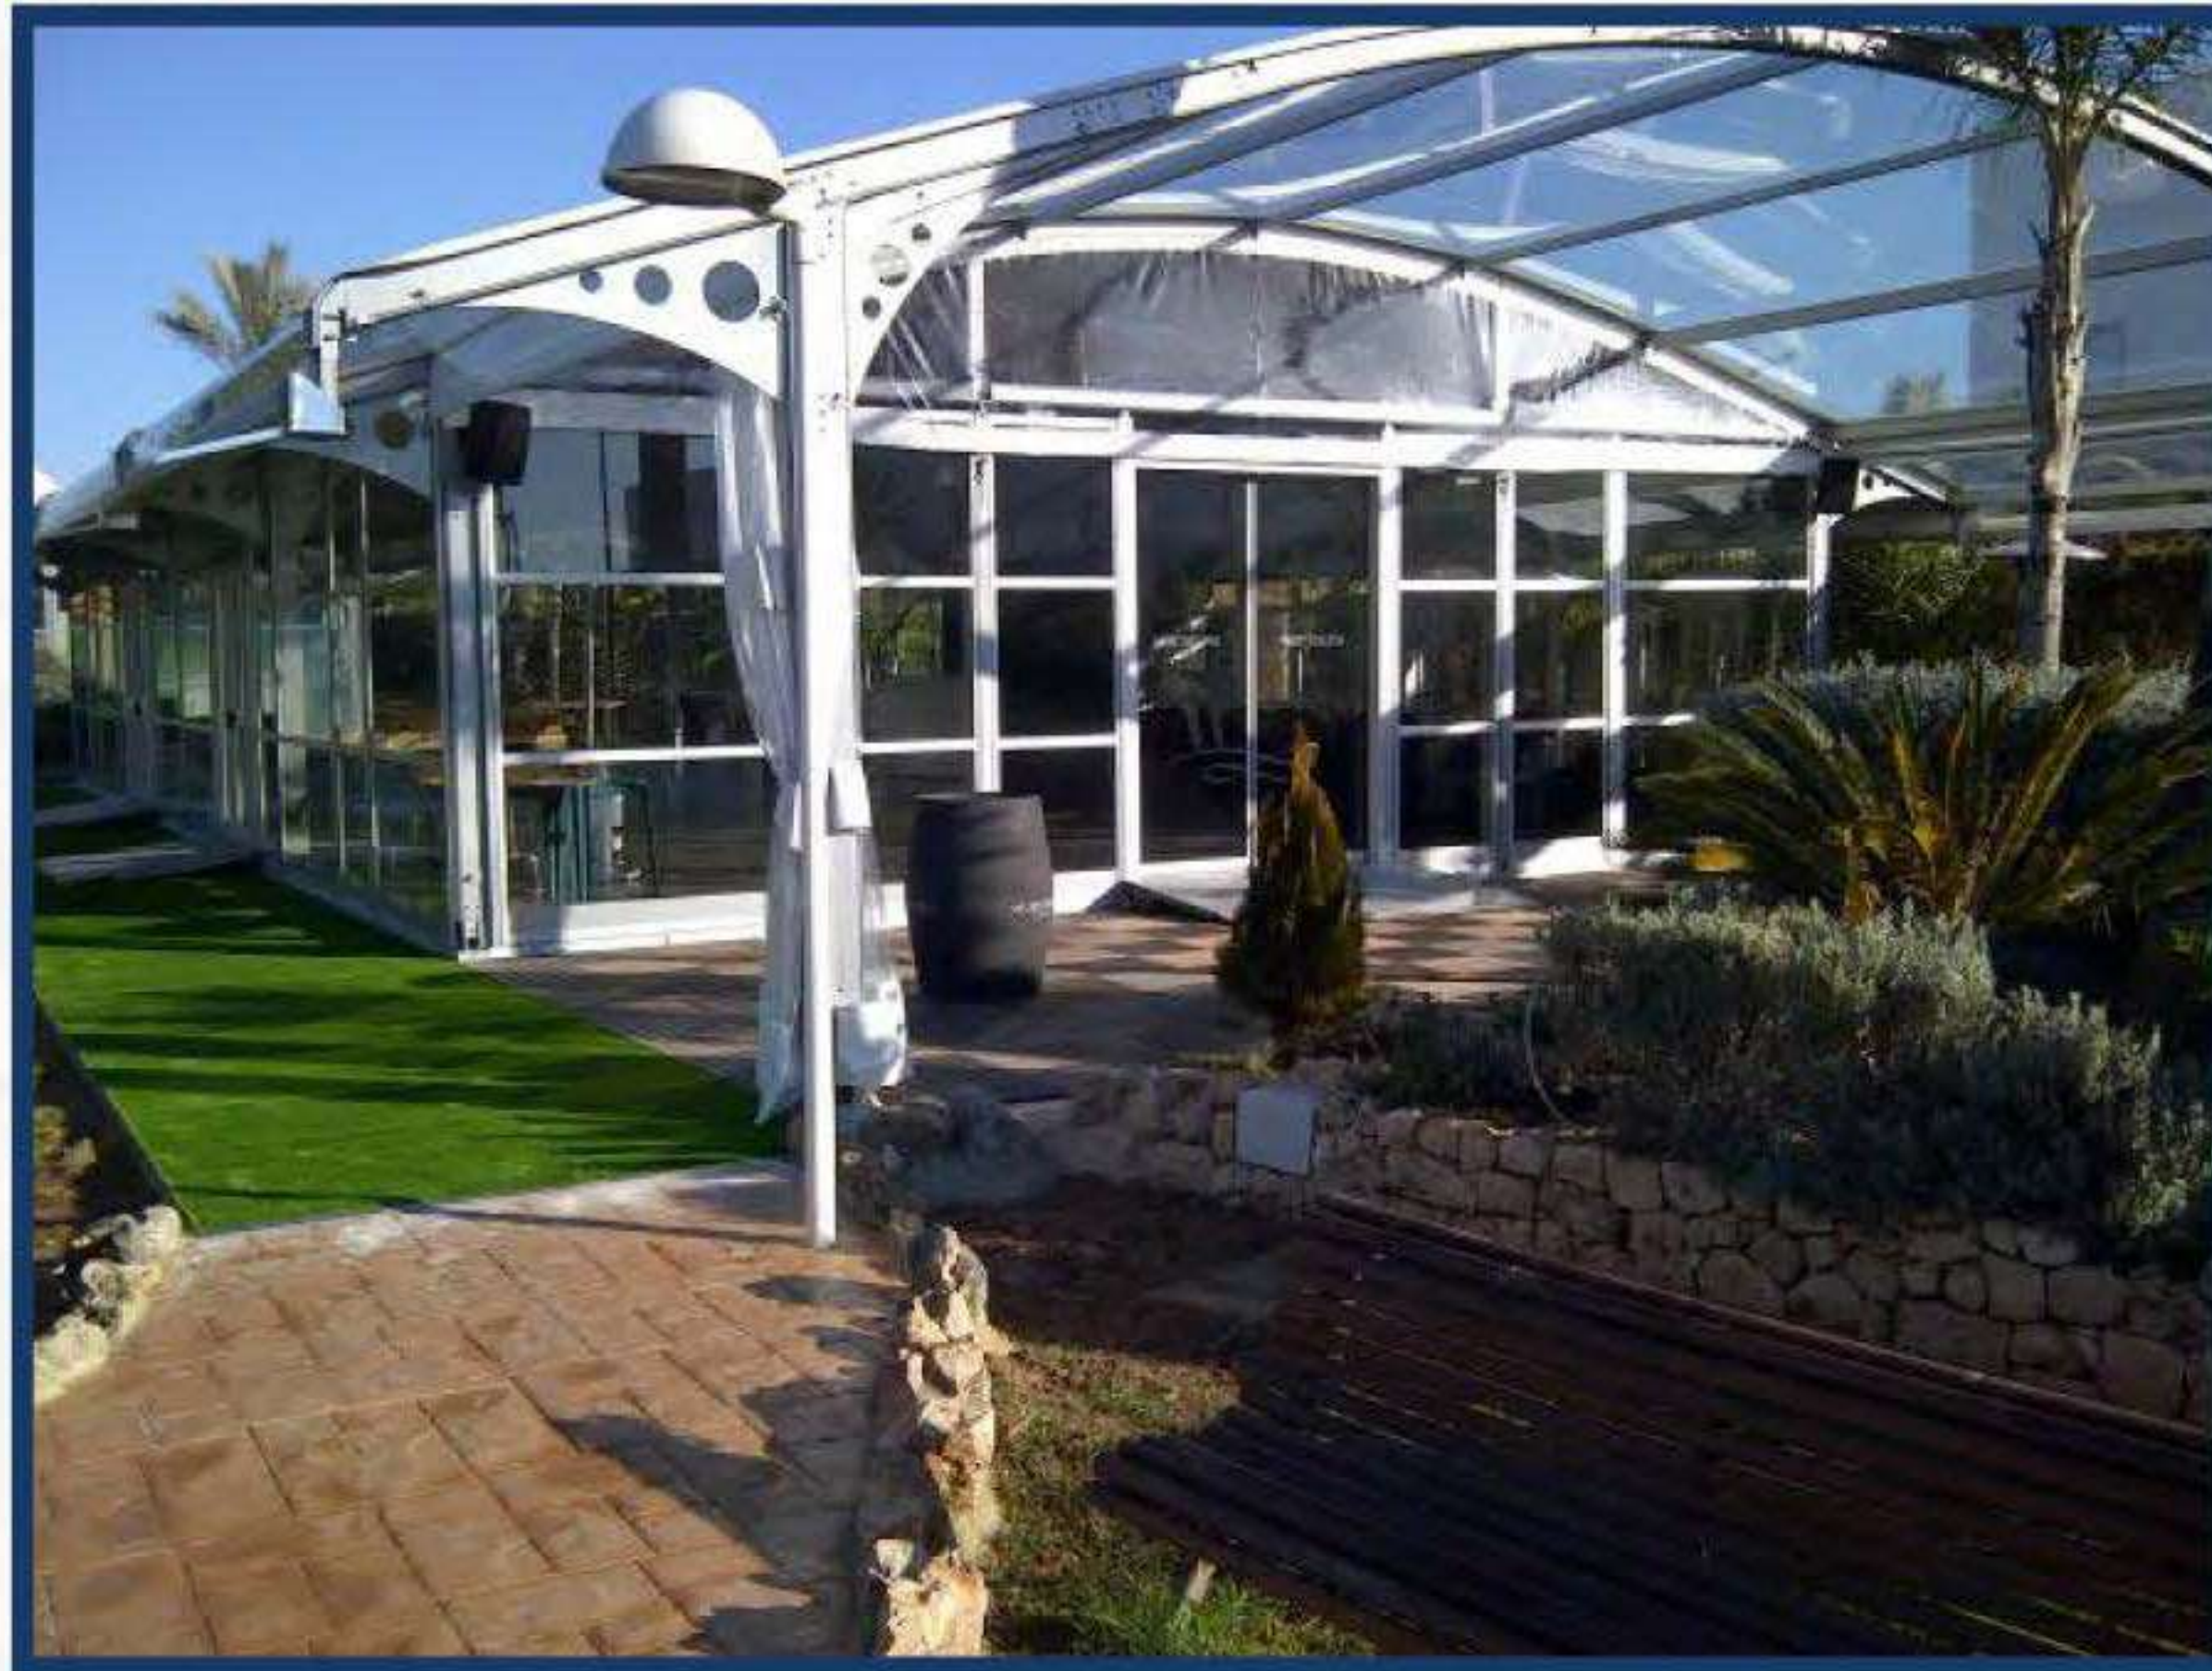

The ceilings are made of white, opaque soft PVC. Designed and manufactured on site with solid and sustainable materials. It is ideal for both short-term and long-term use and for any type of event or activity: shops, supermarkets, areas sports, exhibition halls, theaters ...

FEATURES

Floor system capacity that can be increased (plate: 800/1000 kg. and modules: 600/700 kg.)

Construction ready for delivery

Structures available with floor system

Ground support capacity: 500kG/m2

Roof slope 18 °

Side panels (light resistant) WHITE

Hourglass ruffle wallcovering/curtains availables

Awning available YES

Opaque cover available YES

Attachable to AMG buildings and structures YES

Possibility of installing luxury synthetic door YES

Possibility of installing a door with a bar/glass door YES

Possibility of door installation with locks YES

Possibility of installation of PVC windows in the form of an arch YES

Possibility of installing smoked glass windows YES

Possibility of installing an emergency door YES

TECHNICAL SPECIFICATIONS

Soil capacity 500 kg./m²

Wind force 0,50 KN/m²

Height of the sides 3.050 m.

Maximum height 4.330 m.

Roof tensioning system YES

Snow load 0 KN/m²

Post/support diameter 120 x 200 mm

Visor YES

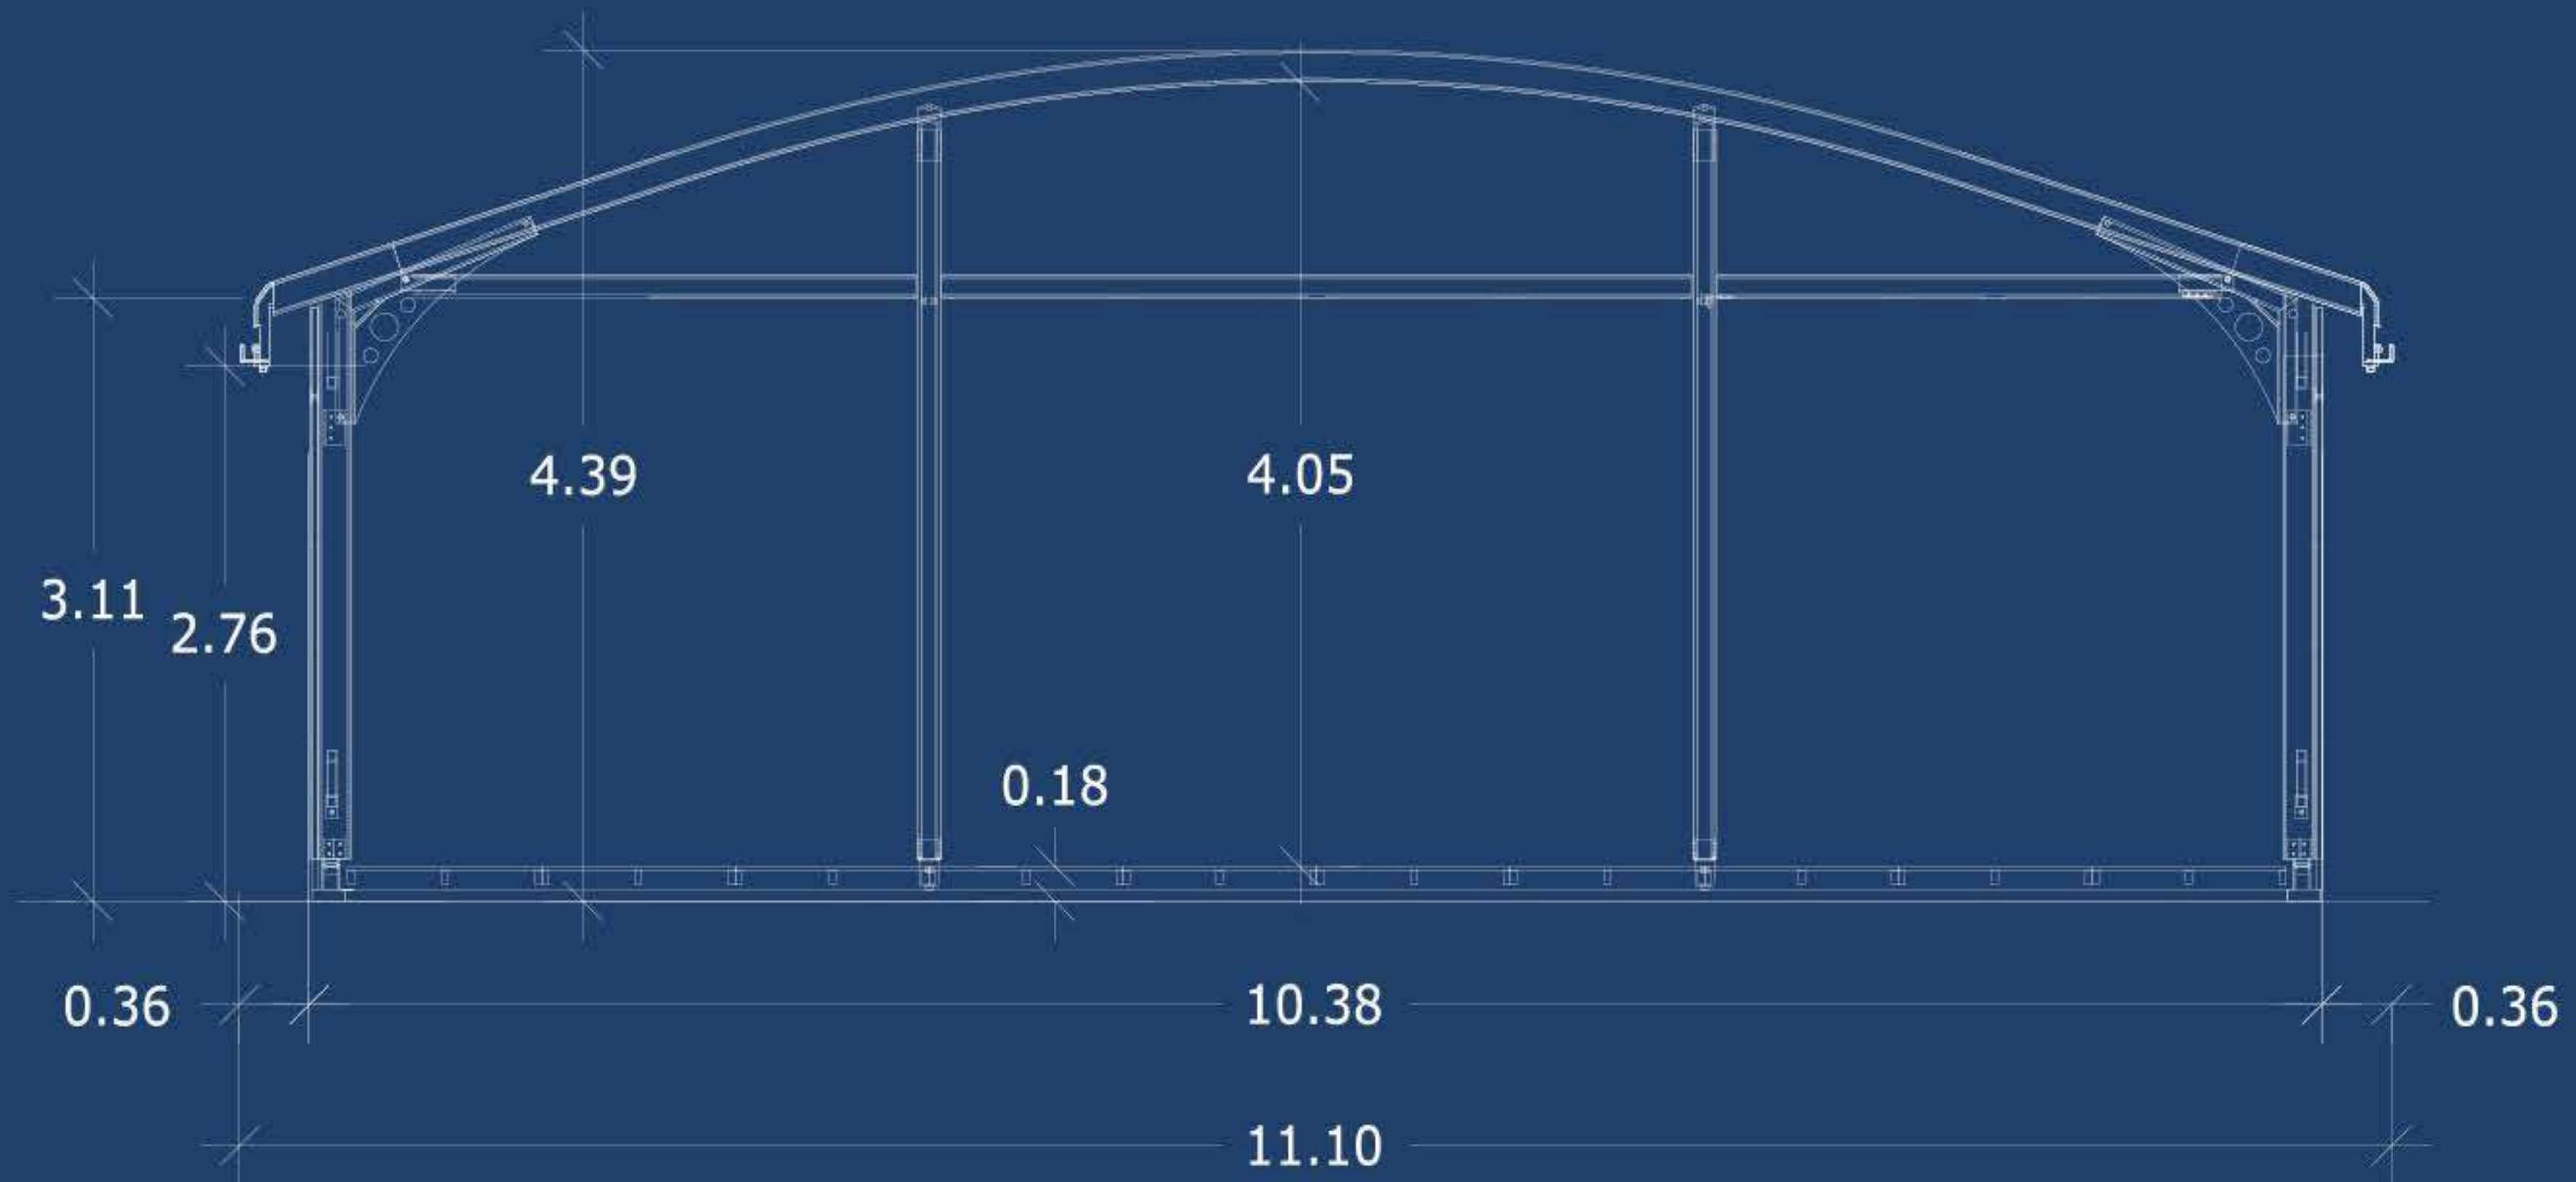

Cuadernas de portal. available

Calculated Static Electricity YES

Possibility of tensioning assembly / Telescopic tubes YES

T.U.V certificates YES
